2GIG-CPLOGO1

DEALER LOGO FOR GO!CONTROL AND TS1

2GIG Technologies is pleased to announce the ability for dealers to add their logos to the GO!Control and TS1 home screens. Now customers can see their dealer's logo every day as they use their GO!Control and TS1 panels.

FEATURES

- Dealer logo will be displayed in the bottom right corner of the GO!Control and TS1 home screens
- Dealer logos will be persistent across version updates

SETUP FEE

$700 US Dealer Price for 2GIG-CPLOGO1 (includes the Alarm.com setup fee) Please contact your 2GIG Sales Representative for additional details

DEALER LOGO PROCESS

The following steps describe the process a dealer must follow to have their logo displayed on their customer's GO!Control and TS1 panels:

1. Submit an order email to logos@2gig.com - reference SKU 2GIG-CPLOGO1.
2. Submit the following items in the order email (only one order email per dealer is required):
   - Dealer logo. Logo submission must comply with logo submission requirements listed below.
   - Contact information for the person responsible for approving the final logo.
   - Alarm.com Customer IDs of the GO!Control and TS1 panels to which the logo will be downloaded.
3. 2GIG will manipulate logos as required to be displayed appropriately on the GO!Control and TS1 home screen.
4. A sample screenshot of the final artwork will be submitted to the dealer for final approval.
   - The final artwork needs to be printed, signed, and returned to 2GIG.
5. After approval, the logo will be sent to Alarm.com.
   - Dealers may then work with Alarm.com to download the logos to their customer's panels.

LOGO SUBMISSION REQUIREMENTS

A logo meeting the following requirements must be submitted to 2GIG Technologies:

- Original logo artwork that can be effectively scaled to the target dimensions of 126x48 pixels with 16-bit color depth. Be aware that the logo is not required to use the full width of the space provided.
- Logos should be comprised of colors that contrast well with the background color where possible.
- For best results, logo artwork must be submitted in scalable vector file format such as Adobe Illustrator (.ai file). If a scalable vector file format version of the logo is not available, high resolution (at least 480 pixels in vertical dimension) raster formats can be accepted (jpg, gif, png, bmp).

Once the logo is submitted to 2GIG, 2GIG will manipulate the logo for exact sizing and color matching.

SYSTEM REQUIREMENTS

All GO!Control and TS1 panels running version 1.6 or later are able to display the dealer logo. Panels running previous versions of software must be updated before submitting the request to download the dealer logo.
