

## World's Most Advanced and Secure Smart Locks

LOCKLY is revolutionizing door security and convenience for homes, rental properties, and offices. With modern features like patented PIN Genie™ Touchscreen, 3D Biometric Fingerprint Sensor, Offline Access Codes, and Voice Assistant control and monitoring, LOCKLY has become synonymous with Smart Lock value and innovation.

### Advanced Features

**Your finger is Your Key:** Fast advanced 3D fingerprint recognition. Store up to 99 fingerprints.

**Peek-Proof Digital Keypad:** PIN Genie™ touchscreen prevents codes from being guessed by always shuffling the location of the numbers.

**Mobile App and Voice Control:** Unlock, lock, or check door status through LOCKLY smartphone app or by simply using your voice with Amazon Alexa or Google Assistant-enabled devices.

**Grant Access Remotely:** Lock and unlock your door from anywhere using the Lockly app on any iOS or Android smartphone or device.

#### **Real-time Control, Monitoring and Status:**

Lockly is the only lock in the world that can monitor open/closed door status in real-time and alert you on your smartphone.

**Create eKeys and Offline Access Codes:** Grant one-time use or specific time duration access by issuing codes or digital eKeys remotely via a mobile device. It works like a banking OTP, no need to download an app. Codes work offline without Wi-Fi and expire once used.

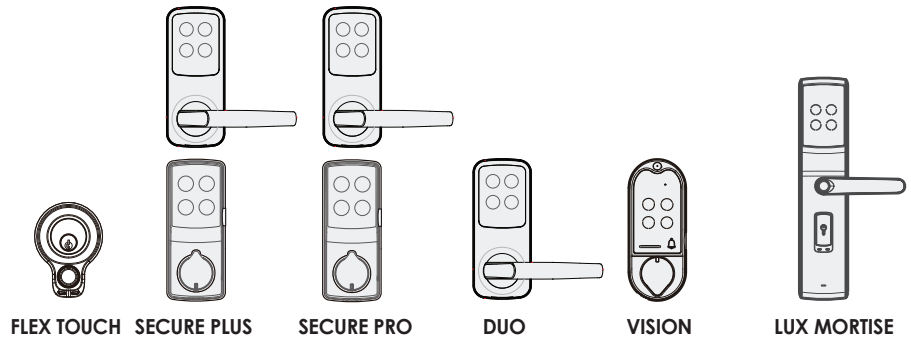

#### **Premium Quality / Lifetime Warranty\***

High quality materials ensures our beautifully designed smart locks stay that way, even in wet, freezing, and hot weather conditions.
