

## Advanced Technology Platform for Property Management

LOCKLY OS™ is a cloud-based solution, which empowers property owners and managers to securely manage their smart locks, grant & revoke user access, and track activity across their properties. The perfect tool for managing doors with LOCKLY Smart Lock from desktop, laptop or smartphone. Providing additional security, ease and convenience for residents, tenants, guests, and with greater control over your service providers.

Control access for multiple properties at different locations in one property management web portal. Save your time and manpower for handling and changing keys.

- Delegate property managers to manage a group of properties or an assigned region
- Grant and monitor access history of property tenants, residents and their guests
- Allow access for contractors and service providers on specified time
- Populate detailed access reports whenever requested
- Check the status of your properties and smart locks in a glance
- Create or revoke access in batches

### Property Managers

While you can impress your potential home buyers with the advanced features of LOCKLY smart lock that comes with purchase, manage multiple home units via LOCKLY OS™

- Delegate user access to different property agents to allow them and their buyers to enter the unit
- Give buyers single-use access code for limited time to let view and experience the property on their own speed
- Remotely unlock and instantly allow contractor and installers to access the units
- Show and assure home buyers of smooth and painless handover of their new house without changing locks

### Home Builders and Contractors

### Multi-Family Residences

Better control, security and access for your residents and tenants.

- Provide sub-admin access to residents and long term tenants and let them grant access to their family members and guests.
- Plan access for maintenance service providers without the residents or an apartment manager on-site.
- Control residents' access to common areas.

### Rental Properties (Airbnb, VRBO, etc)

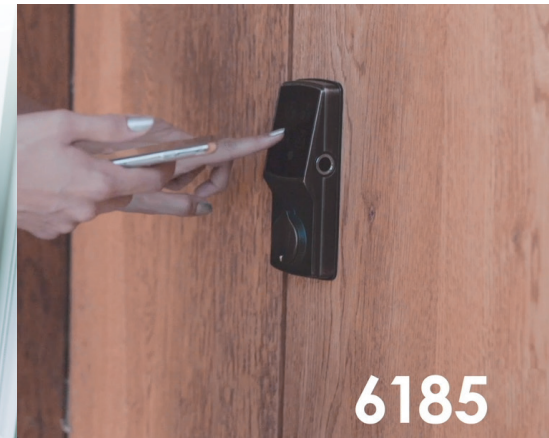

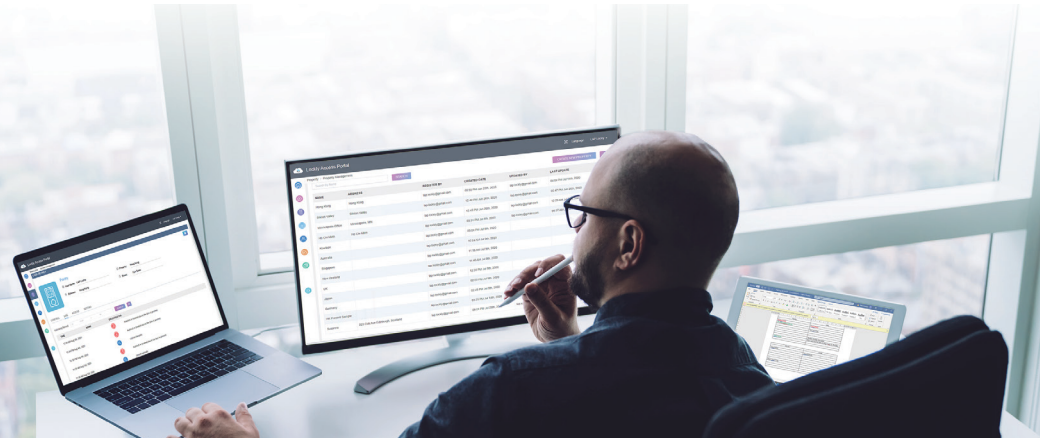

Manage multiple rental properties or rooms providing your guests with the ease of self check-ins. Make your rental property operation contact-less.

- Remotely grant access for confirmed guest or
- Revoke access when cancellations or unexpected incidents occur
- Assign recurring access codes for you cleaners and other service providers

## Property Management Dashboard

### Account & User Management

With tiered user management function, you'll get an insight into who has access rights to which properties and can manage them from anywhere in the world.

### Property and Access Control Management

Invite new users, limit access to specific days and times for individual users. Perform bulk actions to edit existing access permissions with one click, or lock and unlock your door. Paperless and complete traceability on who authorized or revoked access – all directly in your browser or smartphone.

### Data Management

LOCKLY OS™ offers a real-time status overview of all the Smart Locks in your properties in one intuitive and customizable dashboard. Ready API to generate emails and push notifications. Extracted report on excel sheet (CSV) gives you an overview of how and who entered property at what time.
