# SONANCE

## WHY SONANCE?

### PERFORMANCE

Sonance has multiple performance levels to hit any budget and can deliver sound quality for even the most discerning ear. In addition, Sonance makes **custom audio** solutions specifically engineered to perform for all different types of audio.

### COMFORT | COVERAGE

Where dispersion is a performance measurement of a speaker, proper coverage is achieved by specifying the correct number of speakers in a space creating even, balanced sound. Sonance engineers their DSP amplifiers and speakers to provide proper coverage.

### AESTHETICS

Sonance makes audio solutions that blend in with the design of your space indoors and outside. We offer four grille sizes to match today's most popular ceiling lighting and even Invisible speakers for **custom audio** design.

### EASY TO USE

Sonance amplifiers allow almost any source and control platform to work seamlessly together. In addition, the onboard, easy-to-use SONARC software in all of our DSP amplifiers allows for **custom audio** solutions to sound great in any room.

Sonance Provides Audio Solutions for All Budgets and Environments
